# List of Contents

## NUMBER 1

**P. Ben-Abdallah** 1 Propagation of light inside shear flows: a remote sensing method to retrieve velocity fields

**F. Callegari, M. Gallardo, M. Raineri, A.G. Trigueiros** and **J.G.R. Almandos** 13 Spectral analysis of the $4d^9 5d$ and $4d^9 5f$ configurations in octuple ionization of xenon, Xe IX

**L. Di Girolamo** 23 Reciprocity principle for radiative transfer models that use periodic boundary conditions

**E.A. Ustinov** 29 Adjoint sensitivity analysis of radiative transfer equation: 2. Applications to retrievals of temperature in scattering atmospheres in thermal IR

**H.M. Park** and **W.J. Lee** 41 The solution of inverse radiation problems using an efficient computational technique

**J.V.P. de Oliveira, A.V. Cardona, M.T. Vilhena** and **R.C. Barros** 55 A semi-analytical numerical method for time-dependent radiative transfer problems in slab geometry with coherent isotropic scattering

**Ö. Söğüt** 63 Direct measurement of total atomic photoelectric, total atomic attenuation and total atomic scattering cross-sections in the atomic region $22 \leqslant Z \leqslant 58$ at 59.5 keV photons

**P. Ben-Abdallah** 69 Radiative transfer in static and spherically symmetric distording media: from the effective geometry to a kinetic theory

**Ph. Rivière** 91 Systematic semi-classical calculations of Stark broadening parameters of NI, OI, NII, OII multiplets for modelling the radiative transfer in atmospheric air mixture plasmas

**C.-Y. Wu** and **N.-R. Ou** 111 Differential approximations for transient radiative transfer through a participating medium exposed to collimated irradiation

**W.L. Glab** and **A.M. Falleur** 121 High $2s^2np$ Rydberg series and ionization energy of B I

## NUMBERS 2–5

**M. P. Mengüç, N. Selçuk, J. R. Howell** and **J.-F. Sacadura** 129 Preface

**S.S. Penner** 131 Spectroscopy and radiative transfer—selected research and applications

| | | |
|---|---|---|
| **R. Vaillon** | 147 | Derivation of an equivalent Mueller matrix associated to an absorbing, emitting and multiply scattering plane medium |
| **Z. Guo, J. Aber, B.A. Garetz** and **S. Kumar** | 159 | Monte Carlo simulation and experiments of pulsed radiative transfer |
| **M. Sakami, K. Mitra** and **P.-f. Hsu** | 169 | Analysis of light pulse transport through two-dimensional scattering and absorbing media |
| **Z.-M. Tan** and **P.-F. Hsu** | 181 | Transient radiative transfer in three-dimensional homogeneous and non-homogeneous participating media |
| **D. Lemonnier** and **V. Le Dez** | 195 | Discrete ordinates solution of radiative transfer across a slab with variable refractive index |
| **S.A. Rukolaine, M.G. Vasilyev, V.S. Yuferev** and **A.O. Galyukov** | 205 | Numerical solution of axisymmetric radiative transfer problems in arbitrary domains using the characteristic method |
| **Z. Altaç** and **M. Tekkalmaz** | 219 | The $SK_N$ approximation for solving radiation transport problems in absorbing, emitting, and scattering rectangular geometries |
| **P.J. Coelho** | 231 | The role of ray effects and false scattering on the accuracy of the standard and modified discrete ordinates methods |
| **S. Maruyama, Y. Takeuchi, S. Sakai** and **Z. Guo** | 239 | Improvement of computational time in radiative heat transfer of three-dimensional participating media using the radiation element method |
| **S.B. Beale** | 249 | Combined stochastic and transfer model for atmospheric radiation |
| **J. Yamada** | 261 | Radiative properties of fibers with non-circular cross sectional shapes |
| **B.T. Wong** and **M.P. Mengüç** | 273 | Depolarization of radiation by non-absorbing foams |
| **T.-H. Fan** and **A.G. Fedorov** | 285 | Radiative transfer in a semitransparent hemispherical shell |
| **D. Baillis, M. Arduini-Schuster** and **J.F. Sacadura** | 297 | Identification of spectral radiative properties of polyurethane foam from hemispherical and bi-directional transmittance and reflectance measurements |
| **H. Ertürk, O.A. Ezekoye** and **J.R. Howell** | 307 | Comparison of three regularized solution techniques in a three-dimensional inverse radiation problem |
| **A. Soufiani, J.-P. Martin, J.-C. Rolon** and **L. Brenez** | 317 | Sensitivity of temperature and concentration measurements in hot gases from FTIR emission spectroscopy |
| **M.F. Modest** and **S.P. Bharadwaj** | 329 | Medium resolution transmission measurements of $CO_2$ at high temperature |
| **A. Soufiani, F. André** and **J. Taine** | 339 | A fictitious-gas based statistical narrow-band model for IR long-range sensing of $H_2O$ at high temperature |
| **H. Zhang** and **M.F. Modest** | 349 | A multi-scale full-spectrum correlated-$k$ distribution for radiative heat transfer in inhomogeneous gas mixtures |
| **V.P. Solovjov** and **B.W. Webb** | 361 | A local-spectrum correlated model for radiative transfer in non-uniform gas media |
| **A. Runstedtler** and **K.G.T. Hollands** | 375 | Modeling of band overlap in gas mixtures with the smoothed (re-ordered) band model |
| **K. Kudo, A. Kuroda, T. Fujikane, S. Saido** and **M. Oguma** | 385 | Development of a method to estimate profiles of equivalent absorption coefficient for gray analysis |

**J.H. Park** and **S.W. Baek** 397 Nongray thermal radiation effects on the sound wave propagation in gas-particle two-phase medium

**F. Liu, H. Guo, G.J. Smallwood** and **Ö.L. Gülder** 409 Effects of gas and soot radiation on soot formation in a coflow laminar ethylene diffusion flame

**S. di Stasio** 423 Experiments on depolarized optical scattering to sense in situ the onset of early agglomeration between nano-size soot particles

**L.A. Dombrovsky** 433 A modified differential approximation for thermal radiation of semitransparent nonisothermal particles: application to optical diagnostics of plasma spraying

**B.M. Vaglieco, S.S. Merola, A. D'Anna** and **A. D'Alessio** 443 Spectroscopic analysis and modeling of particulate formation in a diesel engine

**V.I. Mazhukin, V.V. Nossov, G. Flamant** and **I. Smurov** 451 Modeling of radiation transfer and emission spectra in laser-induced plasma of Al vapor

**G. Li** and **M.F. Modest** 461 Application of composition PDF methods in the investigation of turbulence–radiation interactions

**D.A. Affonce** and **A.J. Fowler** 473 The effect of thermal lensing during selective photothermolysis

**R. Viskanta** and **J. Lim** 481 Transient cooling of a cylindrical glass gob

**S.A. Leonardi, R. Viskanta** and **J.P. Gore** 491 Radiation and thermal performance measurements of a metal fiber burner

**N. Selçuk, A. Batu** and **I. Ayranci** 503 Performance of method of lines solution of discrete ordinates method in the freeboard of a bubbling fluidized bed combustor

**H.K. Kim** and **T.-H. Song** 517 Measurement of gas temperature distributions in a test furnace using spectral remote sensing

## NUMBER 6

**P. Eriksson, C. Jiménez, S. Bühler** and **D. Murtagh** 529 A Hotelling transformation approach for rapid inversion of atmospheric spectra

**L. Zu, P.A. Hamilton** and **P.B. Davies** 545 Pressure broadening and frequency measurements of nitric acid lines in the 683 GHz region

**J. Steinacker, R. Hackert, A. Steinacker** and **A. Bacmann** 557 The influence of numerical diffusion on the solution of the radiative transfer equations

**H.-S. Chu, S. Lin** and **C.-H. Lin** 571 Non-Fourier heat conduction with radiation in an absorbing, emitting, and isotropically scattering medium

**L.B. Barichello, P. Rodrigues** and **C.E. Siewert** 583 An analytical discrete-ordinates solution for dual-mode heat transfer in a cylinder

**V.M. Devi, D.C. Benner, M.A.H. Smith, C.P. Rinsland** and **L.R. Brown** 603 Multispectrum analysis of self- and nitrogen-broadening, pressure shifting and line mixing in the $\nu_3$ parallel band of $^{12}CH_3D$

**L.H. Liu, H.P. Tan** and **B.X. Li** 641 Influence of turbulent fluctuation on reconstruction of temperature profile in axisymmetric free flames

*Note*

**H. Zhang** and **M.F. Modest** 649 Evaluation of the Planck-mean absorption coefficients from HITRAN and HITEMP databases
